

gotcha!places+™

As a business, your goal is to make sales.
To do this online, you must . . .

Show up high in search results so people can find you.

Provide customers a brand experience on your website and through your social media.

gotcha!places+ provides **THREE** unique ways to solve both these issues:

#1
SALE
CHECK-IN

When your company makes a sale, either by delivering a service, shipping a product, or to a customer who came to your business, you can do a "sale checkin" using our system (iOS or Android mobile app or from gotchaplaces.com).

#2
REVIEW
REQUEST

Our system includes a customer experience loop which allows you to, while doing a checkin, add a customer's email or cell number and trigger a review request.

#3
WEBSITE &
SOCIAL MEDIA
POSTING

Content powers the internet and is the best way to get rankings and attract traffic. Our system adds a page to your website for each and every sales checkin you do. We then push your checkins out to your social media pages where people see all the great things you are doing.

Not your "typical" Checkin!

Most of us know how to do a Facebook checkin. You open Facebook, click "checkin" and once submitted a post is created on your Facebook wall. You've basically checked into a location or place on Facebook delivering little value to your business.

gotcha!places+™ takes the checkin to a whole new level and everything about it benefits YOUR business.

How it Works:

- You make a sale. (Yippee!)
- Open your phone and gotcha!places+™ app.
- Create a checkin in 3 steps:
 - 1) Add the address
 - 2) Take a pic
 - 3) Write a description
- Post!
- Checkins show up:
 - 1) On our website
 - 2) On your website
 - 3) On your social media
- **BOOM!**
